SUMMARY

Senior full-stack engineer with 4 years of experience building and shipping production SaaS: executive-talent, logistics dispatch, workforce time-tracking, healthcare EHR integration and private-aviation platforms, several of them live and linked below. I specialise in NestJS backends, React/Next.js and Nuxt frontends, multi-tenant security (RBAC, MFA, IP allowlisting), real-time systems (Socket.IO, queues), Stripe billing, and document pipelines with OpenAI/LangChain and OCR. I own features end to end, from schema design to CI/CD and deployment on AWS.

EXPERIENCE

MERN Stack Developer — Code Upscale

Jun 2025 – Present

- Built and led the backends of production products including ExecSuccession, On Time Transport and the Vitals 360 Kipu EHR sync, and reviewed and merged 200+ team pull requests across client repos.
- Built secure multi-tenant platforms with JWT auth, RBAC, MFA/2FA, privileged-access controls and IP allowlisting.
- Delivered AI document pipelines using OpenAI, LangChain, OCR/Tesseract, MRZ parsing and PDF/DOCX extraction.
- Built Stripe subscription billing, S3 presigned-URL document flows and Socket.IO real-time dashboards backed by Redis/BullMQ, across MongoDB and PostgreSQL/MySQL stacks.

Full Stack Developer — Aug AI

Oct 2024 – May 2025

- Delivered scalable NestJS systems following clean architecture and strict TypeScript standards.
- Built Socket.IO real-time experiences and conversational AI workflows.
- Built secure middleware, auth guards and interceptors, Swagger API docs, and Docker-based deployments.

Associate Software Engineer — Conovo Technologies

Aug 2023 – Sep 2024

- Built MERN/NestJS backends, REST and GraphQL APIs, and live Socket.IO features.
- Implemented authentication and authorization with Passport.js and JWT.

Machine Learning Engineer — Cyberautix Technologies Limited

Feb 2023 – Aug 2023

- Built YOLO computer-vision pipelines for real-time object detection.
- Prepared and augmented large image datasets, trained models and tuned hyperparameters for production stability.

Associate Software Engineer — Hi Tech Provider

Nov 2022 – Jul 2023

- Built Python and JavaScript backend services, Puppeteer scraping workflows and secure Express.js APIs.
- Developed ResNet-50 image-classification and feature-extraction solutions.

SELECTED PROJECTS

ExecSuccession / ExecExtend — AI Executive Succession & Offer Platform

Jun 2025 – Present

Live: execsuccession.com · execextend.com · Founding backend engineer

NestJS · MongoDB · Next.js 15 · OpenAI · Stripe · BullMQ/Redis · AWS S3 · Puppeteer

- Wrote the first commit and led the backend (about 67% of commits in its first 6 months), growing it to roughly 45 NestJS modules for HR leaders and boards.
- Built the auth, candidate/S3 document, assessment-engine (MCQ, rating and text; public submission APIs) and succession-plan modules, with 4 readiness tiers and 1–5 competency frameworks.
- Added OpenAI resume analysis (pdf-parse/mammoth) and AI-generated development areas and competency summaries.
- Implemented Stripe recurring subscriptions and webhook reconciliation, multi-tenant RBAC with MFA/2FA and IP allowlisting, audit logs, and board-ready PDF reports. Also contributed to ExecExtend (offer optimisation and pay-equity scoring).

On Time Transport — Trucking Logistics & Dispatch Platform

Jul 2026 – Present

Live: [On Time Transport web app](#) · Lead contributor, backend and web

NestJS 11 · PostgreSQL/TypeORM · Redis · BullMQ · Socket.IO · React 19 · Vite · Tailwind v4 · AWS S3

- Top contributor on both the backend and the web app (about 55% and 74% of commits), with separate portals for admin, ops, dispatch, billing and driver managers.
- Built 13 domain modules (loads, drivers, vehicles, plants, customers, chat, notifications, imports, roles and more) in a layered clean architecture.
- Built a drag-and-drop dispatch board with multi-trip load groups, open-to-claim loads and rolled-up partial-delivery status.
- Integrated the Samsara fleet-telematics API and built a generic CSV import engine running on BullMQ workers.

TrackFlow — Workforce Time-Tracking & HR SaaS

Jul 2026 – Present

Live: trackflow.codeupscale.com

Laravel 12 · PostgreSQL · Redis/Horizon · Reverb WebSockets · Next.js 16 · Electron · SQLite · Stripe

- Worked on a multi-tenant, Hubstaff-style platform with a cross-platform Electron desktop agent (macOS, Windows, Linux) and a full HR/payroll suite.
- Fixed timer and idle-detection correctness and midnight splitting in the organisation's timezone, and made report totals accurate.
- Implemented Linux/Wayland screen capture over PipeWire and built the desktop release CI pipeline in GitHub Actions.

UrgentFlights — Private-Aviation Charter Platform

Nov 2025 – Jan 2026

Live: app.urgentflights.com · urgentflights.com

Nuxt 3 · Vue 3 · MongoDB · OpenAI · Tesseract OCR · AWS S3 · SendGrid · Twilio · Socket.IO

- Owned the AI email-to-quote pipeline: an IMAP inbox is fetched, PDF attachments are parsed with several fallback parsers and OCR, OpenAI extracts the fields, and draft quotes are created automatically.
- Built an intelligent flight matcher that uses multi-criteria scoring, confidence ratings and date flexibility.
- Built the client portal (auth, flight requests, quote listing, passenger ledger) with RBAC and two-factor auth.

Vitals 360 — Kipu EHR Sync Service (Healthcare)

Jul 2025 – Aug 2025

Live: portal.vitals-360.com · Sole author of the sync service

NestJS 11 · PostgreSQL/TypeORM · @nestjsjs/schedule · Kipu REST API · Winston · ExcelJS

- Built a daemon that syncs patients from the Kipu EHR into the Vitals 360 monitoring platform for clinics, using diff-based change detection and polling.
- Built room/occupancy mapping with Excel import, a sync-dashboard API, webhook ingestion and admin user management.

Smart Visa Assistant — Visa Application Automation

Mar 2026 – Present

NestJS · TypeORM/MySQL · Redis/Bull · Playwright · Tesseract OCR · OpenAI · AWS S3

- Worked on a visa-automation platform that validates passports, parses forms and captures structured immigration data from documents.
- Used Playwright automation to submit government visa forms with OTP relay and reliable completion reporting.

Wrstopia — Luxury Watch Marketplace

Jul 2025 – Aug 2025

NestJS · MongoDB/Mongoose · JWT · Multer · Nodemailer

- Sole backend engineer on a marketplace where consumers submit sell/service requests and dealers bid on them. Built per-role auth, a dealer bidding engine with a revenue dashboard, and admin tooling.

Earlier Projects

2023 – 2025

- **SALM** (NestJS, PostgreSQL, OpenAI): streaming and batch pipelines for high-volume transactional data, Swagger partner APIs, and AI document analysis.
- **PUNT** (NestJS, MongoDB, Socket.IO): migrated a betting platform off Firebase, with live scores and odds over WebSockets and automated cron payouts.
- **Alchemist** (NestJS, MongoDB): property-valuation, ID-verification and background-check integrations, PDF reports and invoices, and real-time collaboration.

SKILLS

Backend	NestJS, Node.js, Express, TypeScript, Laravel (PHP), REST, GraphQL, Swagger/OpenAPI
Frontend	React, Next.js, Nuxt/Vue 3, Vite, Redux Toolkit, TanStack Query, Tailwind CSS, Electron
Data & Queues	PostgreSQL, MySQL, MongoDB, TypeORM, Mongoose, Sequelize, Redis, BullMQ/Bull, SQLite
AI & Automation	OpenAI, LangChain, Tesseract OCR, PDF/DOCX extraction, Playwright, Puppeteer, YOLO, ResNet
Security & Payments	JWT, RBAC, MFA/2FA, IP allowlisting, Passport.js, Stripe subscriptions and webhooks
Cloud & DevOps	AWS (S3, Amplify), Docker, GitHub Actions CI/CD, Nginx, Socket.IO/WebSockets

EDUCATION

BSc Computer Science, University of Central Punjab, Lahore (CGPA 3.84) · **Intermediate in Computer Science**, Government College University, Lahore

CERTIFICATIONS & LANGUAGES

JavaScript Algorithms & Data Structures (freeCodeCamp) · Ruby on Rails Boot Camp (Devsinc) · Artificial Intelligence (Samsung Innovation Campus) · Python for Everybody & Python Data Structures (Coursera)

Languages: English (Fluent) · Urdu (Native)
